would have to have T-KH clearance to work on ARGON materials because such personnel, particularly in the case of ACIC and AMS, would be the same individuals in the same center who have need for CORONA in geode application of the photography. The Chairman stated that he would prepa for the Committee consideration a memorandum recommending that the T-KH certification be considered to apply to ARGON without further compartmentation. Communist China: Complete Target List and the Highest Priority Target 4. explained the steps he had taken in his effor to reduce the classification of the large compendium of Communist China targets and the Highest Priority List to SECRET level. In the former can be noted that he had been able to confirm that all targets could be reduced to SECRET except those targets suspect as missile installations or atomic energy installations. He proposed in those cases to indicate under the category "installation" the simple term "complex." The Committee saw objection to the use of the compendium of all ChiCom targets currently	reference above. It was the consensus that there was no practical way administratively to separate the workers who under present arrangement would have to have T-KH clearance to work on ARGON materials because such personnel, particularly in the case of ACIC and AMS, would be the same individuals in the same center who have need for CORONA in geode application of the photography. The Chairman stated that he would prepa for the Committee consideration a memorandum recommending that the T-KH certification be considered to apply to ARGON without further compartmentation. Communist China: Complete Target List and the Highest Priority Target 4. explained the steps he had taken in his effort to reduce the classification of the large compendium of Communist China targets and the Highest Priority List to SECRET level. In the former can be noted that he had been able to confirm that all targets could be reduced to SECRET except those targets suspect as missile installations or atomic energy installations. He proposed in those cases to indicate under the category "installation" the simple term "complex." The Committee saw

SECRET. The Committee agreed that no further efforts should be expend at trying to downgrade the remaining items and that the document should issued with the highest classification necessary. Any agency wishing the remaining items downgraded, should feel free to request the controlling agency for such downgrading.
Requirements for Readout of SAMOS (SECRET, not in the T System)
7. Colonel Winterbottom reported on the upcoming SAMOS shots indicating that their primary purpose is R&D. However, he said, the Air Force is now preparing a draft paper for submission to COMOR indicating the requirements against which the readout would program for the electronic recovery. When this paper is prepared, he said, he would place it on the COMOR agenda.
Requirements for the Next CORONA Shot
RONAshot from the Committee guidance should be available within the next two weeks. Accordingly, the members agreed to convene in the Chairman's office at 2:30 on Tuesday next to determine what priority targ should be recommended to Operations as the principal guidepost for their operational plans.
Directives re IDEALIST (IDEA-0081-60, 4 January 1961; IDEA-0082-60, 4 January 1961)
9. of the Security Office/DPD distributed to the members notices approved by the Deputy Director, Plans, regarding the change from codeword CHALICE to IDEALIST and outlining procedures for all to follow in connection with the change.
Downgrading and Release of Satellites, ChiCom, and Indochina (Reference COMOR-D-22/4
10. In response to the Chairman's inquiry as to whether there were any problems in the implementation of the reference, suggested that the actual release of materials be postponed until February 1961 by which time his office would be able to issue the accessions list to cover the frames involved in the material to be downgraded and released. This was agreeable to all.
